

Ritesh Pandey

Senior Software Engineer

pandeyritesh048@gmail.com | +977 9865762048 | Kathmandu, Nepal

LINKEDIN | HACKERRANK | GITHUB

EDUCATION

AISHWARYA VIDYA NIKETAN
SLC

Till-2015
Dhangadhi, Nepal

NEPAL MEGA COLLEGE,
SCIENCE +2

2016 - 2018
BabarMahal, Kathmandu

KANTIPUR ENGINEERING COLLEGE
COMPUTER ENGINEERING BACHELOR

2018 - 2023
Lalitpur, Nepal

EXPERIENCE

CREATORS TECH | FLUTTER DEVELOPER INTERN

Lalitpur, Nepal | December 2022 – January 2023

- Designing the application layout.
- Developing the full interactive application.
- Integrating application with backend.
- Connecting the app to the given API for performing task.

LIS NEPAL | SOFTWARE ENGINEER INTERN

Lalitpur, Nepal | October 2023 – January 2024

- Developing cross-platform application with Flutter.
- Learned SQL and implementing it.
- Learned about data warehousing.
- Learned to work with JIRA project management tool.

LIS NEPAL | ASSOCIATE SOFTWARE ENGINEER

LALITPUR, NEPAL | January 2024 – January 2025

- Developing cross-platform application with Flutter.
- Collaborating with senior engineers to analyze user needs, design algorithms, write code.
- Building scalable and robust software systems.

LIS NEPAL | SOFTWARE ENGINEER I

LALITPUR, NEPAL | January 2025 – July 2025

- Developing web application using Next.js.
- Collaborating for developing AI based project.
- Involvement on PR reviews and peer reviews of code.

YCOTEK NEPAL | SENIOR SOFTWARE ENGINEER

LALITPUR, NEPAL | July 2025 – Present

- Developed AI-powered chat system for retail applications using Next.js, creating responsive and intuitive user interfaces that enhanced customer engagement and support capabilities
- Implemented backend functionality using Python, focusing on API development and system architecture to support real-time chat platform operations
- Conducted comprehensive code reviews to maintain high coding standards, ensure best practices, and improve overall codebase quality across development projects
- Supervised and mentored junior developers, providing technical guidance on coding standards, architectural decisions, and effective problem-solving approaches
- Designed scalable frontend solutions that seamlessly integrated with AI services to deliver real-time conversational experiences for retail customers

- Facilitated knowledge transfer sessions and collaborative development processes to accelerate team members' professional growth and technical capabilities
- Collaborated with cross-functional teams including AI/ML specialists to optimize chat functionality and enhance user experience for retail environments
- Established development workflows and quality assurance processes that improved team productivity and ensured consistent code delivery standards

SKILLS

PROGRAMMING LANGUAGES	Rest API Integration, Dart, C, C++, Javascript, Python
LIBRARIES/Frameworks	Flutter, Bloc, Next
TOOLS / PLATFORMS	Android, iOS, Android Studio, Working with JIRA

PROJECTS / OPEN-SOURCE

RENTAL_APP | [Link](#) Dart, C++, CMake, HTML, C, Swift, Kotlin, Objective-C
 A vehicle renting app where you can book vehicle easily

TAP_ARENA | [Link](#) C++, CMake, Dart, HTML, Swift, C, Kotlin, Objective-C
 A tapping two player game where the one tapping the fastest wins.

SAYITOUT | [Link](#) Dart, C++, CMake, HTML, Swift, C, Kotlin, Objective-C
 A loan app where a user can give or request loan from their friends or different companies more conveniently.

ANTI-THEFT-APP | [Link](#) Java

- An anti-theft app which prevents the mobile from being stolen.
- Also helps to locate mobile in case of theft.
- Also includes safety features for the user

SAAPATI | [Link](#) Dart, C++, CMake, HTML, C, Swift, Kotlin, Objective-C
 A loan app where a user can give or request loan from their friends or different companies more conveniently.(In-progress)

MOVIE_APP | [Link](#) Dart, C++, CMake, HTML, Swift, C, Kotlin, Objective-C

- A movie showing app for showing movie details from API

PAYANYWHERE | [Link](#) Dart, C++, CMake, HTML, Swift, C, Kotlin, Objective-C
 A digital wallet app which make the transacton possible even if the internet connection is unavailable.

MENUSNEPAL | [Link](#) Dart, C++, CMake, HTML, Swift, C, Kotlin, Objective-C
 A Menu App where users can see the menus of different restaurants with their location on map. The users can also contribute by adding the menu of different restaurant

CERTIFICATIONS

- RESEARCH PAPER PUBLISHED ON TITLE OFFLINE WALLET SECURED WITH AES ENCRYPTION - **KANTIPUR ENGINEERING COLLEGE**
- SQL (Basic) Certificate - **HACKER RANK**
- Flutter - **GREAT LEARNING**
- Postman API Fundamentals Student Expert - **CANVAS CREDENTIALS (BADGR)**
- Software Engineer Intern - **HACKERRANK**

HONORS & AWARDS

- BEST PROJECT AWARD IN LITE PROJECT EXHIBITION WITH PROJECT NAME MOBILE ANTI-THEFT SYSTEM
